Announcements

Irving-WRRB storm drain installation construction begins June 1 and is expected to be completed by July 15. This project is necessary to divert roof drainage from WRRB to an existing storm drain system to prevent the continued development of sink holes in the area.

Access to the O'Neill Building will be reduced down as the work progresses, but we will continue to provide access to the building in one location or another at all times.

Additional updates will be provided on potential closures and access issues as the project continues to develop.

For questions, please contact us at 474-7000.

Thank you for your continued patience as we work to make repairs for a safer environment on campus!
