ABR inc. is recruiting for a Plant Ecologist/Land Rehabilitation Specialist

Job Summary: This position requires expertise in field botany, soil science, and data management and analysis. The position primarily will support ABR's established land rehabilitation program, which focuses on restoring disturbed sites in Alaska, including exploration drilling sites, mines, and contaminant spill areas. The successful applicant will assist with planning, implementation, and monitoring of rehabilitation activities, as well as data management, and preparation of technical reports.

Closing date: April 6, 2018

Email resume, 3 professional references with phone numbers (prefer previous supervisors), and cover letter to [hr@abrinc.com](mailto:hr@abrinc.com).
