Announcements

**Dr. David Klein died on Friday, 20 November 2020, in Fairbanks, AK; he was 94 years old. A longer tribute will emerge, but Dave Klein was involved over his lifetime with aspects of wildlife management and conservation since driving to Alaska in a Ford Model A in 1947. He initially worked for the Alaska Department of Fish and Game and then attended the University of British Columbia, Vancouver, Canada, for his PhD. His field studies for this degree resulted in principle studies of the ecological control over caribou population dynamics and set the underpinnings of this species management. Dave joined the US Department of the Interior, US Fish and Wildlife Service and later the US Geological Survey and was seconded to the University of Alaska to head the AK Cooperative Wildlife Research Unit (later the Alaska Cooperative Fish and Wildlife Research Unit, AKCFWRU) that became administered within the Institute of Arctic Biology. Within the wildlife unit and the UA system Dave was extremely active in fostering and mentoring almost 100 graduate students and their field research, along with being a prized colleague to all of our faculty. At his retirement in 1997, he was honored by the Department of the Interior with their highest award, Senior Scientist.**

**Mark Lindberg recently posted Episode 17 of the Hunting Science Podcast, a conversation with UAF's Todd Brinkman and Eduardo Wilner about Why We Hunt. You can either listen to the audio for this podcast or watch the Zoom recording. Give it a listen/view.**

**Today's Quote**

Good friends, good books and a sleepy conscience: this is the ideal life.

Mark Twain

Life Science Hour Seminars are Fridays 4-5 pm during the academic year.
No seminar scheduled this week.
